Email Accounts: I have just gotten a brand new email account with you. How do I check my email?

You can access your email several ways:

1: Go to you webbuilder login, and select Email Login from the top right corner

Username: yourname@yourwebsite.com (**Important Note:** The user name is your entire email address)

Password: *Your temporary password has been emailed to you with the subject: New Email Account Set Up.*
Otherwise if you sent us a support ticket request, your password can be found in your support ticket response.

2. You can also access your email when you are logged into your Web Builder Dashboard in the top right corner link "Email Login"
