

Email Accounts: How do I get an email account for my website?

We can provide you with email addresses associated with the domain name of your website (webmail address). As of 6/11/2025, we charge \$3/month for each address if we are currently hosting your website. If you do not have a website hosted by us, we charge \$5/month per address.

For example: For an website named mywebsitename.com, you could have an email address such as info@mywebsitename.com or yourname@mywebsitename.com.

Among the benefits of having a webmail address are a professional appearance and having an email address that is linked to your website and not you personally.

Please submit us a support ticket through your Dashboard, or send us an email at support@homespunwebsites.com.
