Adding/Editing Content on your Website: How do I move content from one page to another page of my website?

Moving your content from one page to another is easy. Let's say you want to move a video from your services page to your homepage. Follow these simple steps

1. In Edit Website Mode, select the page your content is currently on (in this case, Services)
2. Scroll to the Video and select "Move To A Different Page" from the pop up window that appears on the Video
3. Select your page from the drop down menu provided. (In this case, your Home page)
4. Save your Changes
Your content has now been moved
