Adding/Editing Content on your Website: How Do I Activate the Google Translator Feature?

The Google Translator Tool comes standard in the Web Builder. Now your visitors can translate your website to most of the major languages spoken around the world!

To Activate your Translator Follow these Steps:

1. Click on Website Settings from your Web Builder Dashboard
2. Select the General Tab
3. Select YES next to the **Add Google Translate** to website:
4. Save your Changes
