

Hyperlinks: How do I create Hyperlinks using a File/Link List Page Block?

Using the File/Link list page block is an easy way for Web Builder Novices to build links to other websites.

Follow these steps:

1. Add a New Page Block
2. Select File/Link List and Submit
3. Step 1: Choose a Display Name (i.e. Visit Our Success Partners at Google.com)
4. Step 2: Type in the FULL URL of the site you want to link too (i.e. <http://google.com>)
5. Step 3: (Optional) For Multiple Links on a Page you can Customize your Sort Order
6. Submit your Changes
7. Publish your Website for your Links to begin working
