Music Files: How do I add music to my website?

1. In Edit your Website Mode, select the page in which you would like your music to appear
2. Select Add a New Page Block
3. Select ";Music” (mp3, wav). NOTE: MP3 is the most accepted audio file type, except for Firefox. However, YouTube is universal and it's easy.
4. Title your MP3s ";New Album, Just Released” etc.
5. Either type in the URL of the location of the MP3 from another website **OR** Browse to the appropriate folder on your computer hard drive where your MP3 is stored
6. Upload your files
7. Select Done
8. Publish your Page
