Navigation Pages: What are Orphaned Pages?

Orphaned Pages are subpages who happened to be attached to Top Level Navigation pages that have since been deleted. For instance, you have a Top Level Navigation page called "Condo 1234." Under that page, there are subpages titled, "Property Info," "Rates," "Photos," etc.

If you delete the Condo 1234 page, the subpages (in this case, Property Info, Rates and Photos" no longer have a "Parent" or Top Level Navigation page to associate themselves with. Therefore the pages become Orphaned.
