

Password Protected Pages: How do I edit the pages that my secured groups may have originally had access to but no longer need?

1. Click Page Access from your Dashboard
2. Select the Groups tab
3. Click Edit next to the group you would like to update the pages for
4. Uncheck and/or Check the pages that are currently viewed or not viewed by your group (In this case, we have only selected Member Benefits)
- * Note: if you change this groups pages, **all** members pages of this group will also change
5. Submit your changes

The screenshot shows a web application interface. At the top, there's a navigation bar with links: DASHBOARD, EDIT WEBSITE, NEWSLETTER, MY ACCOUNT, ADMIN TOOLS, and HELP. Below this, a sub-navigation bar includes Home, Member List, Add Member, Groups (highlighted), Pages, and Help. The main content area is titled 'Current Groups' and lists two groups: 'My Second Group (0 members)' and 'My New Group (0 members)'. Each group has 'DELETE' and 'EDIT' links. The 'EDIT' link for 'My New Group' is selected. Below this, the 'EditGroup' form is shown. It has a 'Group Name' field with 'My New Group' entered and a 'Submit' button. To the right, under 'Pages viewable by "My New Group" group', there are three checkboxes: 'Members Only' (unchecked), 'Members Only > Member Benefits' (checked), and 'Members Only > Membership Forms' (unchecked). A note at the bottom states: '* Note: if you change this groups pages, all members pages of this group will also change'.
