

Password Protected Pages: How do I delete a secured member I no longer need?

1. Click Page Access on your Dashboard
2. Select the Member List tab
3. Check the Member you would like to delete (In this case, Firstname, Lastname)
4. Click Delete Checked members (s)

The screenshot shows a web application interface for managing members. At the top, there's a navigation bar with links like DASHBOARD, EDIT WEBSITE, NEWSLETTER, MY ACCOUNT, ADMIN TOOLS, and HELP. Below this, a breadcrumb trail shows 'Home' > 'Member List'. The 'Member List' section has a search bar, a dropdown for 'Number of results per page' (set to 10), and a 'Search' button. Below the search bar, there's a table with columns: Name, Email, Group, and Login. Two members are listed: 'Firstname Lastname' (myname@mysite.com, My New Group, username) and 'Secondname Lastname' (second@mysite.com, My Second Group, secondname). The first member is selected with a checkbox. Below the table, there's a status bar showing '2 emails shown (2 total)' and a red button labeled 'DELETE Checked member(s)' next to an 'OR Move Checked to Group' dropdown menu.
