

Photos: How do I create my own Java Script Slideshow as a top photo of my website?

Creating your own Java Script Slideshow is easy! Plus, Java Script is Iphone and Ipad friendly so you can make sure that your top photo always shows up on whatever your website visitors may be using to view your website.

Follow these steps to create your own Java Script Slideshow:

1. In Edit Website Mode, click on the page you would like to add a Top Photo Slideshow
2. Hover over Add A Top Photo until the Top Photo Edit tool appears
3. Select Slide Show Creator
4. Select Edit/Create Page Slide Show
5. Browse to download your desired photos from your hard drive and/or choose from your image library
6. Once you have selected a photo add a caption to tell the story of the photo/or your website service.
*You can choose to have the text caption hover on the top or bottom of your photo
7. Add your Picture-your thumbnail will now appear under current photos
8. Once you have added all of your desired photos, you can move your images using the up or down arrow to place them in the order you would like them to appear.
9. Save your Slide Show.
