

Photos: How do I replace a photo that is in a table?

How to Replace a Photo in a Table

You can replace a photo in an existing table without deleting or rebuilding the table.

-

From your **Dashboard**, click **Edit Website** in the toolbar at the top of the screen.

-

Go to the page containing the photo you would like to replace.

-

Hover over the section with the table you want to edit.

-

Click **Edit Text** (not **Add/Edit Photos**) in the box that appears on the left of the section.

-

Click the photo you would like to replace.

-

Click the **Image** icon in the editing toolbar.

-

In the **Insert/edit image** window, click the small **File Folder** icon to the right of the **Source** field.

-

Photos: How do I replace a photo that is in a table?

Select the replacement photo from your **Photo Library**.

To use a new photo from your computer instead, click **Upload**, upload the photo, and select it.

-

Click **OK**.

-

If needed, resize the new photo by dragging one of the small resizing handles at the corners of the photo.

-

Click **Done**.

Your new photo will replace the previous photo in the same table cell.

Tip: If the replacement photo is a different size from the original, the spacing between the photos may change. Making the new photo smaller will create more space between it and the other photos.

Publish Your Changes

To make your changes live:

-

Click **Publish Now** in red in the upper-right corner of your screen.

-

Click **Let Me Choose**.

Photos: How do I replace a photo that is in a table?

-

Tick the box next to the page you edited.

-

Click **Publish These Pages**.
