Photos: How do I change the order in which my photos appear in the photo gallery?

Many people want to present their photos in a specific order. You can do this easily in the Photo Editor:

1. Select Edit Photos on the Page Block that you would like to re-sort your images in
2. The photo editor will now display all of your current images appearing on in your page block under the Current Images queue
3. Left click your mouse on the Up/Down arrow located next to the Photo you would like to move
4. Drag your photo up or down in the order in which you would like it to appear in your photo gallery
5. Click Done
6. Publish your Website
