Search Engine Optimization: Where do I set up Meta Titles?

1. In Edit Website Mode select Search Engine Optimization on the page you wish to optimize.
2. Type your Title in the "Search Engine Title" section (i.e Plumber in Portland)
3. Click ";Save”

Note: If you set up a Meta Title for the Home Page it will populate all pages with this title. However, you can set up separate Meta Titles for each page of your website. This is important for websites with multiple services or sections and increases your chances of getting found.
