

Side Banners: How do I add a side banner image that links to a page within my own website?

1. From your Web Builder Dashboard select Manage Side Banners from the Website Content section. Or you can also reach it in Edit Website mode via the Side Banner Library link on your main menu bar
2. Select Image (with Link)
3. Browse to find the image in which you would like your page to link OR select image from your File Library
4. Select **Option 3 Internal Link** and from the drop down menu choose the page within your website in which you want your image to link

5. Give your image a sort number. ***1 is highest in order, 100 is lowest**
6. Select the pages you want the image link to appear on or choose Show On All Pages
7. Submit your side banner and publish your pages
