

# *Social Networking: How do I add Social Networking "Share" buttons to my website?*

It's so easy!

1. In Edit Website Mode, simply click on the page you want to add share buttons too.
2. Click on "Rename Page" as this will take you to that particular pages settings
3. Check the box "Show Share Buttons"
4. Done your Changes
5. Repeat steps 1-4 on each page you would like share buttons added too
6. When completed, publish your ENTIRE website to make your Share Buttons live.

The screenshot shows a window titled 'Current Page: Home' with a 'Close / Cancel' button in the top right. The main heading is 'Rename your Webpage' with a 'HELP' button. Below this, there are several settings: 'Web Page Name:' with a text box containing 'Home'; 'Add/Display Form on this page?' with radio buttons for 'Yes' and 'No' (selected); 'Hide this page?' with radio buttons for 'No' (selected) and 'Yes'; 'Link this to another Website?' with a note '\* does not create a page, creates a link in navigation bar' and a 'URL:' text box containing 'http://'; 'Password Protect:' with an empty text box; 'RSS Feed this page' with an unchecked checkbox; and 'Show Share Buttons' with a checked checkbox and a row of social media icons (Facebook, Twitter, MySpace, YouTube, LinkedIn, etc.). At the bottom, there is a 'Save' button. A 'Tips' box contains three instructions: 'Give your page name a good general description of what the page is about.', 'Do not use "/" (forwardslashes in the name), use "-" instead.', and 'To move your page, change the "This is a subpage of".'
