

Videos (YouTube/Google Videos): How do I add a video from a video file located on my computer to my website?

1. In Edit Website Mode-click the page you want your video to appear on.
2. Click "Add a New Page Block";
3. Select Video (You Tube, Google, Flash)
4. Title your video
5. Browse for the video file you wish to embed from your computer hard drive.
6. Select file and upload your video to your website
7. Done your changes
7. A video player will appear and play your video

***Note-the size of your movie file may affect loading time. Please compress your video to smaller size in your Video programming software before uploading it to your website. If you still cannot load it into your library-send your video file to us by email and we will load it for you.**
