Blog: I would like to add a news feed of my most recent blog posts to my side banner. How do I create that?

The side banner area of your website has a Blog/News Feed feature that you can easily activate to allow your website visitors a sneak peak at your most recent blog/news posts.

To activate your Side Banner News Feed follow these steps:

1. From your Web Builder Dashboard, click "Banners" in the "My Toolbox" box.
2. Select "Recent News/Blog Posts".
3. Title your News/Blog Feed (i.e. Recent Updates, Headlines, (My Website) News.
4. Choose the amount of entries you would like to showcase in your side banner. (5-10 is ideal due to space)
5. Choose the pages you would like your News/Blog Post feed to appear on
6. Publish your entire website for your changes to appear
