Calendar Feature: The Calendar feature has been added to my website. How do I get started?

1. From your Web Builder Dashboard, click on "Setup Calendar" located in the "My Tools" box.
2. Name Your Calendar (i.e. Events, Board Meetings, Gig Calendar etc). This name will become the ";Page" name on your website. If you just want to keep it generic, just call it ";Calendar”
3. Turn your calendar ";On”
4. You will now be able to add events to your calendar. To learn more how to add an Event to your Calendar [Click Here](#).
