

# *Domains: I registered my domain with another company but would like to transfer it to you so that my website and domain are all in one place. How do I do that?*

Before You Begin You Need To Do 3 Things

- To unlock your domain
- An authorization code for .com, .net, .org, .biz, .us, .tv, or .info domains
- A valid domain administrative contact

**NOTE:** The move between registrars can take a week once the transfer is authorized. The process to transfer a .eu domain differs.

**For more information about transferring domains to us from a particular registrar, see these guides:**
