

Domains: Can I have more than one domain name?

Yes! An alias is another domain name that is associated with your website. Anyone who visits the alias name will automatically be re-directed to your main website domain. You can buy an alias if you want several names for your website or if you want to buy the domain names that could be possible mis-spellings of your domain name.

If you want to add an alias to your account, please submit a support ticket from your Web Builder Dashboard, or email us at support@homespunwebsites.com.

For a fee, we will register your new domain name and set up your aliases.

Unique solution ID: #1030
