Paypal: How do I add a PayPal button to my side banner?

In order to add PayPal to your side banner you must create a Buy Now button in your PayPal account per their instructions. Once you have generated your PayPal HTML code follow these instructions:

1) Select Side Banner Library from your Dashboard or Edit Website Menu Bar
2) Select Text/HTML Code Banner from the Create New Banner list
3) Select "Textbox". (A plain white box should appear)
4) Paste your HTML Paypal generated code
5) Select a Default Sort order number if necessary. *The sort order helps organize the order your side banners appear on your site. The lower the sort number 1-10, the higher the banner will appear on your page
6) Select the page in which your PayPal button will appear on, or select all pages
7) Submit your new banner
8) Publish your ENTIRE website for your new side banner to appear
