

# *SimpleCart Shopping Feature: How do I set up PayPal as my Merchant Processor in my SimpleCart?*

To configure your PayPal so that you can begin accepting payments in your SimpleCart follow these instructions:

- 1) Create an account at [PayPal.com](https://www.paypal.com)
- 2) In order to use [Express Checkout](#), you must first have a Website Payments Standard [Business Account](#) at PayPal.

[Website Payments Pro](#) requires upgrade and monthly fees.

\* **Important:** You must properly configure a payment methods with correct Logins, Passwords and Settings before use.

Please check with your Payment Processor for details on accepting payments through your website.

- 3) PayPal requires you to setup an API Credentials before use

To create an API signature:

- Log into PayPal, then click **Profile** under **My Account**.
- Click **API Access**.
- Click **Request API Credentials**.
- Check **Request API Signature** and click **Agree and Submit**.

\* You must have a PayPal Business account to create a signature.

- 4) Once all of these steps have been completed in your PayPal Account, return to the Web Builder
- 5) Select Store Manager from your Web Builder Dashboard
- 6) Select the Payment Modules Tab
- 7) Type in your API USER, API PASS and API Signature provided to you from PayPal
- 8) Click Enable
- 9) Save your Payment Settings
- 10) Publish your Website
