

Blog: I want to separate my blog entries by topic. How can I organize my blog entries by category?

Categorizing your blog entries is very easy in our Blog. From your Dashboard follow these steps:

1. Select Website Settings on your Dashboard
2. Select the Blog Settings Tab
3. Under Add New Category give your category a name
4. Select Add This
5. Repeat these steps until all categories have been created
6. Publish Website

Your category will now act as a "subpage" of your blog in which you can add new entries.
