

*Blog: I would like people to be able to leave comments on my blog.
How do I turn that feature on?*

1. From your Web Builder Dashboard click on Blog Settings
 2. Select View/Post. This will allow people to view and post comments on your site
- *For Maximum Exposure, select the Facebook Connect Comment feature. Make it easy for people to comment about your Blog RIGHT IN THEIR FACEBOOK ACCOUNT*
3. Save your Changes
 4. Publish your Entire website for your comment boxes to appear at the bottom of each entry
