

Design and Custom Graphics: How do I change my Website Design?

1. In Edit Your Website mode, select "Design Browser" from the light blue Main Menu Bar above your website editing tools. Here, you will be taken to a screen that allows you to try on different designs before you choose your favorite one.
2. Using the Scroll bar, scroll through the available designs and click on your selected design. The Design Browser will automatically give you a preview of that design in the preview frame.
3. Choose from a variety of color styles for that design to match your logo.
4. Save your Design choice
5. Click on Edit Website to return to your editing tools.
6. Your site will automatically update to your new design. Click on Return to Edit Website

***Having trouble choosing? Submit a Support ticket from your Web Builder Dashboard to our design team for complimentary suggestions. Our design team will help you choose the best design for your logo and website type. It's one of our favorite things to do! :)**
