

Design and Custom Graphics: How do I change the color style of my design?

We offer a variety of color styles for each of our designs so that you can find the most complementary color to match your logo. If you have the design you like and merely want to change the style color, follow these steps:

1. In Edit Website mode, select "Design Style" from the light blue Edit Main Menu Bar
2. Choose your new color style from the available choices.
*If you need more advanced color choices use our Advanced Design Builder tools to customize your own design style (COMING SOON)
3. Your new style will automatically update to your website. For changes to appear, you must publish your entire website
