Domains: How do I update the server records for my domain with Network Solutions?

Please Note: This process is intended for customers who want to have their website hosted with us, but also maintain hosting
and/or e-mail with Network Solutions.

Please Follow Network Solutions directions for updating A Records:

http://www.networksolutions.com/support/a-records-ip-addresses-2/

What you will need to know:

The IP Address you will be pointing to is "204.232.152.63" (without quotation marks)

TTL should be set to 14400

Unique solution ID: #1166
