Domains: I have more than one Web Site in my account. When I'm logged in, how do I switch to another site?

You can easily switch to any of your Web Sites from your Web Builder Dashboard. Just follow these steps:

1. Login to your Website by clicking on "Owner Login" at the bottom of your website

2. All of your websites can be accessed from your Web Builder Dashboard. Simply click on the website domain link that you want to start editing.

3. If you want to switch to another domain, you can click on your other domains directly in the Header of your Dashboard.
